

SL-series solid state input relay

0 VDC

60 VDC

50 mA

0,2 V

0,4 V

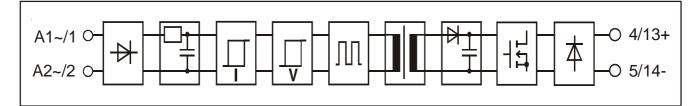

20 ms

40 ms

-

- Plug-in input relay for 110...120 VAC voltages
- 50 mA maximum load current
- 0...60 VDC load voltage
- Works without logic supply (4 pole)For PLC input signal conditioning
- Immune to disturbances on signal lines
- For use with proximity switches
- cULus tested (UL and CSA)
- CE (EMC and LVD tested)
- Integrated status LED

Block diagram

Secondary

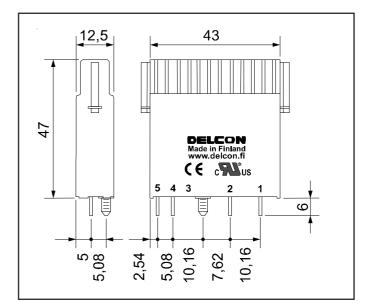

Specifications (at temperature of 25 °C)

Primary

Input voltage	nominal	110120 VAC	Load voltage	minimum
Input current	typical	7 mA		maximum
at nominal voltage	maximum	8 mA	Load current	maximum
Input voltage	minimum	95 VAC	Voltage drop at max. load	typical
range (abs.)	maximum	140 VAC		maximum
Input impedance	typical	17 kΩ	Switch-on delay	typical
Switch-on voltage	typical	80 VAC		maximum
5	maximum	95 VAC	Switch-off delay	typical
Switch-off voltage	typical	60 VAC		maximum
C	minimum	50 VAC		
Switch-off current	typical	3,5 mA		
Noise immunity	typical	10 mJ		
,				

Physical dimensions and other data

Color of casing: orange

Dimensions in mm.

Temperature limitations

Ambient temperature	Limitation
-25 °C+40 °C	No limitations
+40 °C+55 °C	Only every other relay should be in on-state when assembled side by side.
+55 °C+70 °C	If relays are most of the time on, there should be a gap in both sides at least 12,5 mm. In multichannel mounting bases every other place should be empty.

Temperature range:

Storage:	-40 °C+70 °C
Operation:	-25 °C+70 °C

Derating when switching inductive loads

This relay is ment for PLC inputs and similar loads. A clamp diode must be used when swiching inductive loads.

Fusing

To protect relay against short circuit and overload a fast fuse with the correct rating for the load and the capacity of the relay should be chosen, for instance from the Wickman 193 range. Note that when overload current is not large it is possible that the fuse will not protect the relay because of the tolerance on the fuse rating.

Approvals

CRUS UL-file E 162828

The relay fulfils EMC-directive 89/336/EEC requirements. Product has been tested according generic standards EN50081-2 and EN50082-2. The relay fulfils also requirements of the low voltage directive 73/23/EEC.

Guarantee

(

The solid state I/O relays and accessories made by Delcon Oy are guaranteed free from design and manufacturing defects for a period of three years from the shipping date. For electromechanical relays the guarantee is one year. The guarantee liability is limited to replacement of defective material and related shipping charges. Defective products must be returned to the factory for evaluation. This guarantee does not cover damage due to incorrect use or electrical overload.
